Skipped: 2

- I would like to spend more time doing specific activities with the children.
- More time for the adults to work and socialise together.
- Maybe the pupils could work on something that they could present to their own school.
- Some students could not take part in some activities in Finland. The activities should be organised in such a way that all the students can take part in.
- Building
- They should be part and parcel of the syllabus.
- To maybe add activities where they do something hands-on such as creating something - but it all depends on the type of activity planned.
- The students who participate in the learning activities should get concrete results so that they can share them with their friends when they turn back their school. (two more answers are the same with this one)
- All the students should do the same activity.
- When each country introduce activities to each other. The children have put a lot of energy in to the activities, but not all of them had the time to participate. So more time for the activities, which we had planned in advance.
